# Tomàs Ortega

# Curriculum Vitae

I am currently studying the communications requirements for convergence of distributed optimization algorithms in a network. This includes algorithms for Federated Learning and Decentralized Control.

### Education

- 2021 **Ph.D. in Electrical Engineering and Computer Science**, *University of California*, present *Irvine*, Irvine.
- 2020 2021 Master's degree in Mathematics, Master's in Advanced Mathematics and Mathematical Engineering, UPC, Barcelona.
- 2015 2020 Bachelor's degree in Mathematics, CFIS, UPC, Barcelona.
- 2015 2020 Bachelor's degree in Telecommunications Engineering, CFIS, UPC, Barcelona.

# Professional and Research Experience

- June **Graduate Fellow at NASA Jet Propulsion Laboratory**, Designing and supervising the experimental tests for the channel sounding of Lunar South Pole communications. Developing novel algorithms for cooperative and compressed localization, Pasadena.
- September Research Assistant at UPC (Signal Theory and Communications Depart-2020 – ment), Design and optimization of 5G coverage estimators in urban scenarios, along January 2021 with implementation and testing of the proposed solutions, Barcelona.
  - February **JVSRP Internship at NASA Jet Propulsion Laboratory**, Development and July 2020 implementation of an adaptive-sweep algorithm for carrier acquisition and tracking in spacecraft radios (link to publication), Pasadena.
  - January **Research Project Collaborator at HP**, Design of a ultrasound positioning system

    July 2019 for mobile printers, with an emphasis on the position calculation and communications software, Barcelona.
  - Summer of **Summer Internship at BaseTIS**, Enhancing task automation and parallelization 2018 for data analysis and reporting for Gas Natural Informatica, Barcelona.

# Conferences and workshops

- International Conference on Machine Learning July 2023
- Information Theory and Applications Workshop February 2023
- o IEEE Aerospace Conference March 2021

# Other Courses and Seminars

- Seminar on quantum and classical error-correcting codes, organized by Simeon Ball, UPC (2021)
- Online Course Using Python for Research, offered by Jukka-Pekka Onnela, Harvard University (2020)
- Summer Course FME 1st Course of Introduction to Research, organized by Juanjo Rué, UPC (2019)
- Summer Course JAE School of Mathematics , organized by Yago Antolín and Mario García Fernández, ICMAT-UAM (2019)
- Winter Course Game Theory, offered by Josep Freixas, UPC (2019)
- Winter Course Introduction to Deep Learning, organized by Xavier Giró, UPC (2018)
- Summer Course BarcelonaTech Mathematics Summer Camp, organized by Fundació Privada Cellex, UPC (2015)
- Online Course Programming Mobile Applications for Android Handheld Systems, offered by Adam Porter, University of Maryland (2014)
- Summer Course Programming and algorithmics, offered by Salvador Roura and Jordi Petit, UPC (2014) and (2013)
- Summer Course Computer graphics, offered by Alvar Vinacua, UPC (2013)

# Languages

Spanish Native C1 certificate
Catalan Native C1 certificate

French Good

## Other Merits and Awards

### During graduate studies

- 2023 **IEEE Signal Processing Society**, Signal Processing Scholarship, awarded.
- 2023 ICML Federated Learning Workshop, Early Career invitation, awarded.
- 2023 **Catalan Society of Mathematics**, Évariste Galois prize for best MSc thesis in Catalonia, honorable mention.
- 2022 NASA's Jet Propulsion Laboratory, JPL Graduate Fellowship, awarded.
- 2021 **UCI**, Electrical Engineering and Computer Science department fellowship, awarded.
- 2021 Balsells program, Balsells graduate fellowship, awarded.

## During undergraduate studies

- 2020 Google Hash Code, 2nd team Spain, 171th global.
- 2019 Google Hash Code, 1st team Spain, 75th global.
- 2018 **Kernel Analytics Datathon**, *2nd place*, Accuracy when classifying Parkinson's Disease onset of symptomatology using sensor data.
- 2018 Google Hash Code, 1st team Spain, 53rd global.
- 2015 CFIS, CFIS scholarship, awarded.

#### During high school

- 2015 **UAB ARGÓ** prize for excellence in a mathematics and programming project, awarded, As part of my research project in high school I developed a free and open-source Android App called MAT. It allows users to solve some elementary math problems and is available on Google Play click here to view.
- 2015 Spanish Programming Olympiad, finalist.
- 2014 CIMS Cellex Program, shortlisted.

# Other Appointments and Experience

May 2023 – Representative for the School of Engineering at UCI's AGS, Representing the present School of Engineering on the elected Associated Graduate Students council, Irvine.
